DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 21-28 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The claims comprise a separate species that was not previously considered.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-28 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, "electronic poster kits" and "posters" are not clear as to their meaning. The specification does not provide a clear line of demarcation as to the technical meaning of each. As is, the scope of the claims cannot be ascertained. The Examiner regrets that this observation was not previously presented.

It is noted that that the Abstract does not recite both features noted above. Correction is required.

Claim Rejections - 35 USC § 103

4. Claims 1-7, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Seet et al., US 6,725,203.

Seet discloses over the Internet a subscriber maintaining and updating electronic posters kits, e.g. Figs. 5A, 5B, each containing a plurality of posters, e.g. 506-510, that may be displayed and modified by a subscriber. Seet does not specifically recite a subscriber selecting from a remote location by transmitting data over the Internet. To have provided such for Seet would have been obvious to one of ordinary skill in the art. Doing such would incorporate common knowledge use of the Internet when modifying documents.

5. The previous rejection from Paper No. 7 is withdrawn.

6. Further pertinent references of interest are noted on the attached PTO-892.
